Javascript Typescript React Native with Redux/Redux Saga/Redux Thunk
Team Communication
Team Lead

Intermediate level skills:

React JS
Flutter
Mongo DB
Node JS with express for API development

WORK EXPERIENCE

AMNIL Technologies	July 2019 — Present
<i>Application Engineer</i>	

As an **Application Engineer** at AMNIL Technologies was to develop mobile applications with React Native along with providing support to previous projects for feature enhancements and issue fixes.Also from time to time I provide support to frontend team on React JS projects and also mentor interns for React.As for my recent role for latest project I have been doing **Team Lead & Application Engineer**where I was managing my team member's along with communicating with the client and closing communication gap with the team and client. Understand the requirement of the client and see that the team understands it and get it done.

Mobile App Developer

I was employed at Hazesoft as an mobile app developer (Android Native App developer/ React Native Developer). I had been developing React Native App in Hazesoft since Dec,2018 alongside Android Native Apps. My core responsibility is to look over all the current projects app-side, upgrade them with new technologies and features as required and fix bugs if any arises. I have previously worked at Hazesoft as a Junior Android Developer for approximately 4 months ,where I had delivered two apps in Java , in co ordinance with my Senior developers.

Hazesoft Pvt. Ltd

Oct 2017 — Dec 2017

Android Internship

Learned about android development processes and its architecture, software development life cycles in a real world project

PROJECTS WORKED ON

Android Native Projects:

- Hayn Customer App
- Hayn Provider App
- Lugmety Customer App
- Lugmety Driver App
- Lugmety Restaurant App
- Albagal
- Dokaan
- Yummy
- Lugmety Driver App v2
- Lugmety Customer App

React-Native Projects:

- HR PIE
- DishHome Care
- cdmSmith
- ePharmacy Nepal
- Nagarik News
- Hamro Nirman
- Mamut ERP (Magro)
- Vesta Home
- Vesta Partner

Personal Projects

- e commerce using React JS and firebase - <https://omg-clothing.herokuapp.com/>
- Covid Tracking with MERN stack - <https://covid19-mern.herokuapp.com/>

College Projects

- **Project Aider** - We developed web application for repository and project and task collaboration using Java for final year project.
- **Restaurant Management System** - We built a desktop app using Java platform which managed the employee records, menus and calculated bills. The app also showed graph of most sold food items for minor project.
- **Departmental Billing System** - We designed a system for calculating the bills for a supermarket using C++.
- **Hotel Management System** - We designed a system that reserved the room and calculated the total bill of the customer using C.

INTERESTS

Coding

Learning new technologies/languages in programming

Cooking

Music
